User ID:   
Password:

2. Click the **Finish** button when you have entered the required details.

## WIRELESS

The router comes shipped with the wireless function enabled so there is no configuration necessary in order to use the wireless function.

To connect to the router wirelessly, search for wireless network on your WiFi enabled device (laptop, tablet, smart phone) and select the wireless network name that is listed on your wireless security card. When prompted enter the wireless security key that is listed on your wireless security card for the password.

If you wish to disable the wireless function, change the default network name or password you will need to change the settings on the wireless setup pages. **You can find instructions for this in the user guide.**
