Telstra SIM Card Data Codes

There are several different APNs available from Telstra. Each APN requires a different MICA code to be written to the SIM card by Telstra before the APN can be used.

- 🛜 telstra.internet – assigns a private IP address in the 10.x.x.x range.
- 🛜 telstra.corp – assigns a fixed WAN private IP address of the customer's choosing.
- 🛜 telstra.extranet – assigns a dynamic, publicly routable IP address.

The table below summarises the available APNs.

MICA CODE	APN	ACCESS PURPOSE	IP ADDRESS ASSIGNED	SESSION IDLE TIME	BILLING DEPENDENCIES
GPTCOMB3	telstra.internet	Internet	10.x.x.x	None	Any Data pack data volume plan or PAYG
GPCORPB3	telstra.corp	Wireless IP WAN	Customer Choice	RADIUS Controlled	Any Data Pack data volume plan or PAYG
GPTEXB3	telstra.extranet	Internet	203.x.x.x	None	Any Data Pack data volume plan or PAYG

Please contact Telstra to add or remove MICA codes from your SIM.
