IPTV Setup Guide
(3G15Wn)
This guide will help you configure your 3g15Wn for IPTV. To configure your 3G15Wn for IPTV perform the following steps.

2. Enter ‘admin’ (without quotes) as both the username and password and click Ok.

3. Mouse over Advanced and select ATM Interface.

4. Press the Add button.
5. Set the VPI to 0 and the VCI to 35.

6. Set the **DSL Link Type** to EoA.

7. Set **Encapsulation Mode** to LLC/Snap-Bridging.

8. Set **Service Category** to UBR Without PCR.

9. Set the **Connection Mode** to the default mode - single service over one connection.

10. Enable **Quality of Service** and press **Apply**.
11. The ATM summary page should show an entry for ATM1 as shown below.

12. Mouse over Advanced and select WAN service.
13. Press the **Add** button.

14. Select ATM1/(0_0_35) as the layer 2 interface.
15. Press the **Next** button.
16. Select Bridging as the **WAN service type**.

17. Changing the **Service description** is optional.

18. Press the **Next** button.
Press Apply/Save.

Your 3G15Wn is now configured for IPTV.
