By plugging in a USB printer or a USB hard drive to the router, the functionality of these products will be able to be shared with everyone connected to the 3G29WN2.

The 3G29WN2 features the latest standards of wireless security so your network remains free from unwanted users. An advanced firewall and VPN pass-through functionality allows for maximum security and caters for the encrypted Point-to-Point communications from connected computers through the 3G29WN2 to a VPN Server. The Port Forwarding and UPnP functionality provided by the 3G29WN2 make it easier for today’s Internet users to setup and configure the various Network Port Rules needed by Internet applications such as Online Gaming, Peer-To-Peer file sharing and Instant Messaging services.

1 Maximum wireless signal rate and coverage values are derived from IEEE Standard 802.11g and 802.11n specifications. Actual wireless speed and coverage are dependent on network and environmental conditions included but not limited to volume of network traffic, building materials and construction/layout.

2 Speeds are dependent on network conditions and coverage. See coverage maps of your carrier or mobile service provider for more details.
