How To Get The Wireless Security Key
(3G29WN2)
What is the Wireless Security Key?

The wireless security is also known as the WEP key, WPA key, Passphrase or WiFi password. This guide will take you through the steps on how to check what the current wireless security key is. Please ensure that your modem/router is connected to your computer using an ethernet cable before continuing.

Step 1: Determining the Network Authentication Type

2. Enter admin for both username and password when prompted then click OK.

3. Click on the WIFI menu then click the Security option.
4. Under the Manual Setup AP settings, click the link that says **Click here to display**.

5. A small window will pop up and display the current wireless security key. The example below shows the security key as **a1b2c3d4e5**
