Changing the default administration password

(3G17Wn)
Changing the default administration page password

Changing the default password *(and username)* allows you to prevent unauthorised access to the administration page of your modem / router / VOIP ATA.

- Technical Support are unable to obtain your username and password.
- If you forget your administration page login details, you will need to perform a factory reset to restore the default username and password of **admin**.
- This will also clear any stored settings on your modem / router / VOIP ATA.

* - If supported by your model of modem / router.
Changing the default password

This guide will take you through the process of changing the password required to login to the administration page of your modem / router / VOIP ATA.

1. Navigate to [http://192.168.20.1](http://192.168.20.1) in a web browser using admin as the username and password.

2. Hover over Administration and then select Management.

3. Enter a new password under the Administration settings with admin in the account field.

4. Press Apply.

5. You will then be prompted to re-login to the administration page. Remember to use the new password (and username if you changed it) you have just entered.
