Changing the Default Administration Password
(3GT1Wn)
Changing the default administration page password

Changing the default password (and username)* allows you to prevent unauthorised access to the administration page of your modem / router / VOIP ATA.

Technical Support are unable to obtain your username and password.

If you forget your administration page login details, you will need to perform a factory reset to restore the default username and password of **admin**.

This will also clear any stored settings on your modem / router / VOIP ATA.

* - If supported by your model of modem / router.
Changing the default password

This guide will take you through the process of changing the password required to login to the administration page of your modem / router / VOIP ATA.

2. Enter ‘admin’ as both the username and password and press the Submit button.
3. Select Management from the Administration menu.

4. Under Administrator Settings enter ‘admin’ in the Account field.
5. Enter a new password into the Password field.
6. Press Apply.

Remember to use the new password (and username if you changed it) you have just entered the next time you login to the 3GT1Wn.
