Changing the default administration password
(NB6PLUS4)
Changing the default administration page password

Changing the default password (and username)* allows you to prevent unauthorised access to the administration page of your modem / router / VOIP ATA.

Technical Support are unable to obtain your username and password.

If you forget your administration page login details, you will need to perform a factory reset to restore the default username and password of **admin**.

This will also clear any stored settings on your modem / router / VOIP ATA.

* - If supported by your model of modem / router.
**Changing the default password**

This guide will take you through the process of changing the password required to login to the administration page of your modem / router / VOIP ATA.

1. Open your web browser and go to the address [http://192.168.1.1](http://192.168.1.1), using **admin** as the username and password.
2. Click on “Management” from the menu at the top of the page.
3. Click on “Management Accounts” from the menu on the lefthandside of the page.
4. Enter the password you would like to use into the “New Password:” and “Confirm New Password:” sections
   (if you would also like to change the username, replace “admin” with your chosen username)
5. Click “Apply”.

You will then be prompted to re-login to the administration page. Remember to use the new password (and username if you changed it) you have just entered.
