Changing the Default Administration Password
(NF3ADV)
Changing the Default Administration Password

Changing the default password (and username)* allows you to prevent unauthorized access to the administration page of your modem / router / VOIP ATA.

Technical Support is unable to obtain your username and password.

If you forget your administration page login details, you will need to perform a factory reset to restore the default username and password of admin.

This will also clear any stored settings on your modem / router / VOIP ATA.

* - If supported by your model of modem / router.
**Changing the default password**

This guide will take you through the process of changing the password required to login to the administration page of your modem / router / VOIP ATA.

2. Enter “admin” as both the username and password and press the Login button.

3. Select the “Switch to Advanced View” option from near the bottom of the page.
4. Select the "Change Password" option from the "Network Setup" menu.

5. You will then be prompted to re-login to the administration page. Remember to use the new password (and username if you changed it) you have just entered.
