Configuring NB12WD for iiNet VoIP.

2. Enter "admin" for both the username and password when prompted.
3. Select Voice from the left hand side of the window.
4. Now type the following information as required

- Interface name: ppp_8_35 (from drop down menu)
- Local selection: AUS – Australia (from drop down menu)
- Preferred codec: G729 (from drop down menu)
- Preferred ptime: 40
- Use SIP proxy: should be ticked
- SIP proxy: sip.state.iinet.net.au *
- SIP proxy port: 5060
- SIP proxy domain: iinetphone.iinet.net.au
- Register expire time: 300
- DispName: iinet Number
- VoIP phone number: iinet Number
- Auth. ID: iinet Number
- Auth. Password: iinet Password

* ACT sip.act.iinet.net.au
  NSW sip.nsw.iinet.net.au
  NT sip.nt.iinet.net.au
  QLD sip.qld.iinet.net.au
  SA sip.sa.iinet.net.au
  TAS sip.tas.iinet.net.au
  VIC sip.vic.iinet.net.au
  WA sip.wa.iinet.net.au
5. Now click on **Apply and Save all VoIP parameters**.
6. Now click on “Management” on the left hand side of the page and then click on “Save/Reboot”.

7. Now click on “Save/Reboot” button to save all setting and reboot the modem.

The modem will reboot after about 2 minutes. The screen should then state “phone 1 current status” and should show “Register to SIP proxy succeed”.
