N600 Dual Band WiFi Gigabit Modem Router with Voice

Perfect for
- Connecting to your fixed line ADSL service
- Future proofing with a Gigabit WAN port for high speed connection to the NBN and support for IPv6 addressing
- Sharing the connection of a 3G/4G USB dongle
- Reducing your phone call costs by utilising VoIP
- Creating a storage network to share files saved on a hard drive with all connected users

KEY FEATURES
1. Fully featured ADSL2+ Modem Router
2. 1 x 10/100/1000 Gigabit Ethernet WAN port for connection to fibre services
3. 4 x 10/100/1000 Gigabit Ethernet LAN ports for wired connections
4. High speed dual band Wireless N access point offering speeds of up to 600Mbps
5. 2.4GHz and 5GHz wireless frequency allows for cleanest possible wireless signal
6. 1 x FXS port for connecting a telephone to make VoIP calls
7. 2 x USB host ports – supports 3G/4G USB modem and USB storage device for file sharing
8. Built-in media server. Just add a USB hard drive
9. NBN ready: carefully developed hardware and software features to ensure this device is optimised for use on the National Broadband Network:
   - Wireline Routing Speeds
   - IGMP Snooping
   - Jumbo frame support
   - IPTV IGMP V1 V2 Pass through
   - VLAN tagged/untagged frames
   - QoS:TOS/DSCP to 802.1p mapping (DiffServ)
10. IPv6 ready for the next generation IP addressing
11. WPS button for simple setup of your wireless network
12. Multiple power saving features – time of day LED dimming, power down functions
N600 Dual Band WiFi Gigabit Modem Router with Voice

By featuring both an ADSL2+ modem and a Gigabit WAN port you can choose whether you connect to the Internet via ADSL or a fibre service. If you don’t have a fibre connection, the Gigabit WAN port will have you protected should you choose to update in the future.

This router also includes 2 x USB host ports that can be used to connect USB devices so that their capabilities can be shared with all connected users. Connect a compatible 3G/4G USB modem that can act as an additional connection option when a fixed line connection is not available, like at a holiday home. Connect a USB hard drive so that all files stored can be accessed and shared.

All of these features can be shared with at blistering speeds with multiple users via the built-in Gigabit LAN ports and the concurrent dual band WiFi N access point. The high speed dual band WiFi N provides a signal strong enough to penetrate the far corners of a house and can connect all Wi-Fi enabled devices, such as laptops, smart phones, gaming consoles, tablets and PCs. The four Gigabit LAN ports provide a wired connection that can be used to connect desktop computers, media devices or any Ethernet equipped product.

1 Maximum wireless signal rate and coverage values are derived from IEEE Standard 802.11g and 802.11n specifications. Actual wireless speed and coverage are dependent on network and environmental conditions included but not limited to volume of network traffic, building materials and construction/layout.

PACKAGE INCLUDES
- N600 Dual Band WiFi Gigabit Modem Router with Voice
- Power Adapter
- Printed Quick Start Guide
- Ethernet Cable (RJ-45)
- Phone Cable (RU-12)
- Wireless Security Card
- Warranty Card

SPECIFICATIONS

PACKAGE CONTENTS
- N600 router
- Power adapter
- Ethernet cable (CAT 5e)
- 3G/4G USB Modem
- Power Cable
- Documentation
