ADSL2+ 4-Port Modem Router

The NetComm Gateway Series is the perfect range for all users wanting to experience the full benefit of ADSL2+.

The NetComm Gateway Series ADSL2+ 4-Port Modem Router has a single built in 4 port ethernet switch, providing internet and file sharing between multiple computers.

With speeds of up to 24Mbps’ watching movies, downloading music and online gaming becomes second nature with this powerful but compact device.

With all the features you expect from a quality modem/router the ADSL2+ Modem Router comes with a NAT firewall and QoS making it suitable for any use that requires prioritisation such as online gaming or VoIP.

The ADSL2+ Modem Router comes with a single Ethernet port for connecting to existing networks with the added convenience of a USB port for computers running Windows 98 SE/ME/2000/XP/Vista without a network card. The ADSL2+ Modem Router is also Windows 7 compatible, making it the perfect choice if you’re looking for a modem that will work with the new OS.

1. Maximum wireless signal rate and coverage values are derived from IEEE Standard 802.11g and 802.11n specifications. Actual wireless speed and coverage are dependent on network and environmental conditions included but not limited to volume of network traffic, building materials and construction layout.
2. Speeds are dependent on network conditions and coverage. See coverage maps of your carrier or mobile service provider for more details.
3. Refer to your mobile service provider for activation of your voice service and information about the call charges that apply. For assistance with the operation of your analogue telephone handset, refer to the documentation.
