NB9WMAXX Call Waiting Information

**Firmware:** D111-S306NCM_C01_R10

Call Waiting test with 1 phone connected to the NB9WMAXX.

**Scenario 1**
You are currently on a VoIP call, and a PSTN call is incoming. You will hear beeping in background to signify this.
Do the following:
1. Press Flash once to pick up the incoming PSTN call.
2. Press Flash once again to switch back to the original VoIP call.

Note: This also works when you are on a PSTN call and you get an incoming VoIP call.

**Scenario 2**
You are currently on a VoIP call, and you want to make an outgoing PSTN call.
Do the following:
1. Press Recall once, and then dial the number.
2. Press Recall once again to switch back to the original VoIP call.

Note: This also works when you are on a PSTN call and want to make a VoIP call at the same time.
