**VDSL2 - NBN AND UFB READY**

Connect customers to ultra-fast nbn™ or UFB services using the future-ready and versatile NF10WV to access a choice of VDSL2/ADSL2+ networks as well as all nbn™ and UFB fibre services including:

- Fibre-to-the-home (FTTH) through the Gigabit WAN interface
- Fibre-to-the-Node (FTTN) and Fibre to the Basement (FTTB) through the DSL interface

The NF10WV is comprised of hardware and software carefully developed and tested to ensure optimisation and compatibility for use on the nbn™ network: wireline routing speeds, IGMP snooping, IPTV IGMP V1 V2 pass through, QoS.

**TRIPLE PLAY SERVICES**

The ideal triple play services enabler, the NF10WV supports the transmission of high-speed data, HD TV and over the top video streaming as well as high quality voice calls connecting up to 2 phones.

**POWERFUL WIRELESS EXPERIENCE**

Equipped with a powerful WiFi N300 access point, the NF10WV extends high speeds and a strong wireless signal throughout the house. With a quick and easy connection to wireless devices using the WPS button, the NF10WV connects multiple users, sharing the 300 Mbps speed among all wireless devices in the house for optimal connectivity to laptops, smart phones, gaming consoles, tablets and PCs, smart TVs, set top boxes and others.

**MEDIA HUB OF THE HOME**

Connect up to 2 USB devices, and access and share A/V file content with the connected devices in the home network.

1 Maximum wireless signal rate and coverage values are derived from IEEE Standard 802.11g and 802.11n specifications. Actual wireless speed and coverage are dependant on network and environmental conditions included but not limited to volume of network traffic, building materials and construction/layout.
