

# Backup & Restore Configuration Guide

NF18ACV NC2 FAQs

## Back up your settings

---

This guide provides you with instructions to back up and restore your router configuration.

It is recommended to make a backup of the current working configuration in case you lose your settings or need to perform a factory reset (i.e. reset default settings).

This guide has been revised to include the latest changes and updates from the NF18ACV's new NC2 web user interface.

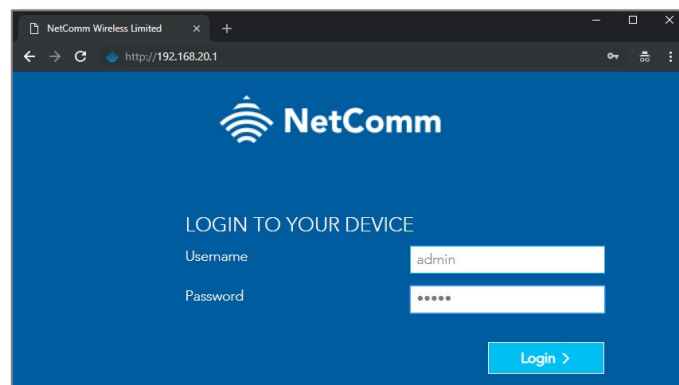

## Login to Web User Interface

---

Connect a computer and the NF18ACV using an Ethernet cable. (A yellow Ethernet cable was provided with your NF18ACV).

- 1 Open a web browser (such as Google Chrome or Mozilla Firefox), type following address into the address bar and press **Enter**.

**http://192.168.20.1**

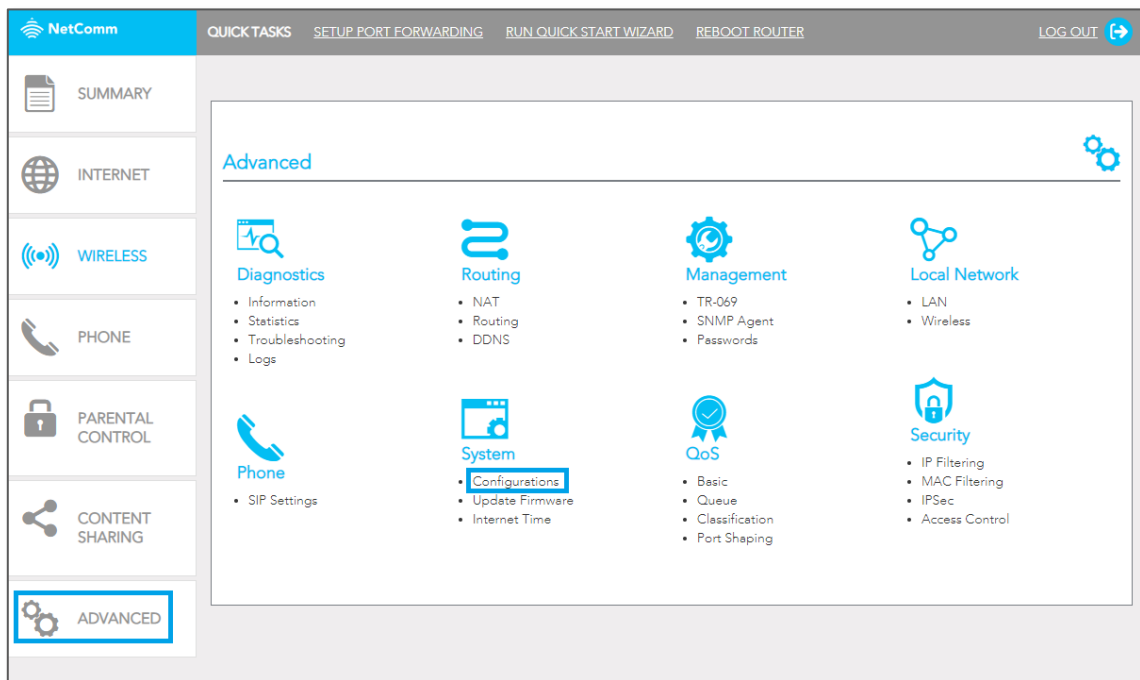

- 2 Enter the following credentials in the **User Name** and **Password** fields:  
User Name: **admin**  
Password: **admin**
- 3 Click the **Login** button.

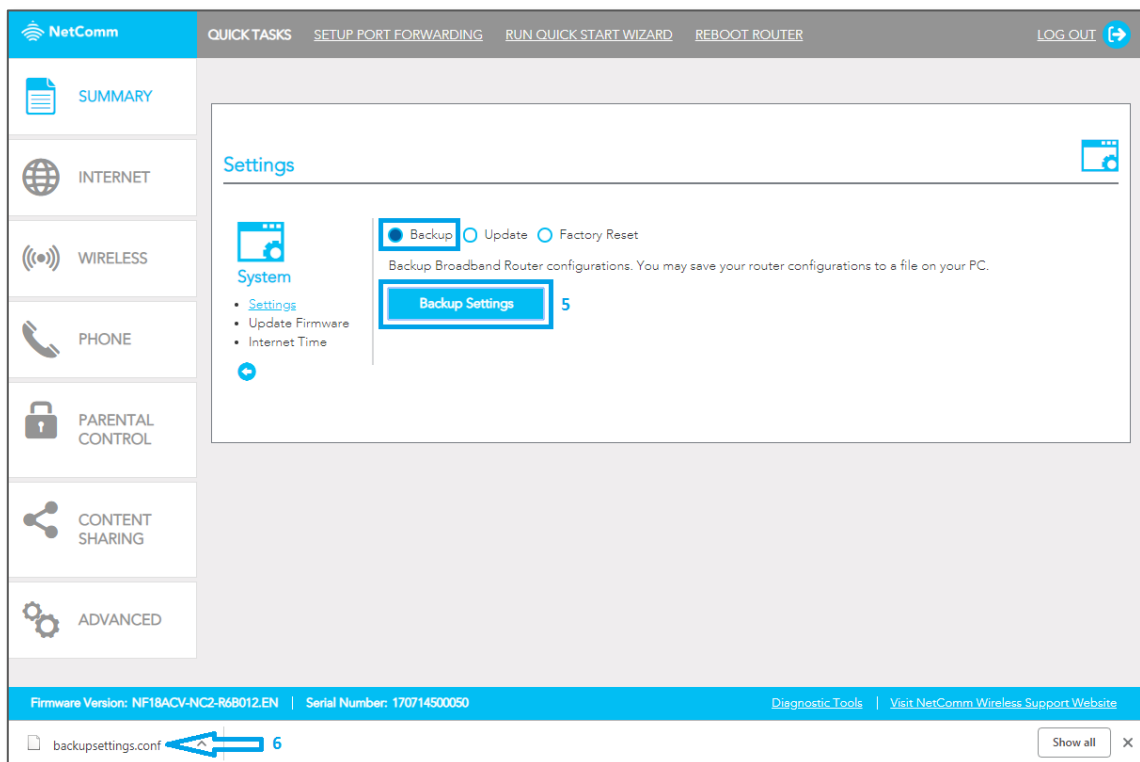

**Note** – If no authentication prompt is displayed or you see a request time out message, refer to the *What if I cannot access Web User Interface* guide from FAQs section.

- From the **Advanced** menu, click on **Configurations** in the **System** group.

- From the **Settings** page select the  **Backup** radio button and click on **Backup Settings** button. The **Settings** page will open.

- A file named "**backupsettings.conf**" will be downloaded to your browser's download directory. Move that file to any of your preferred directory to keep it safe.

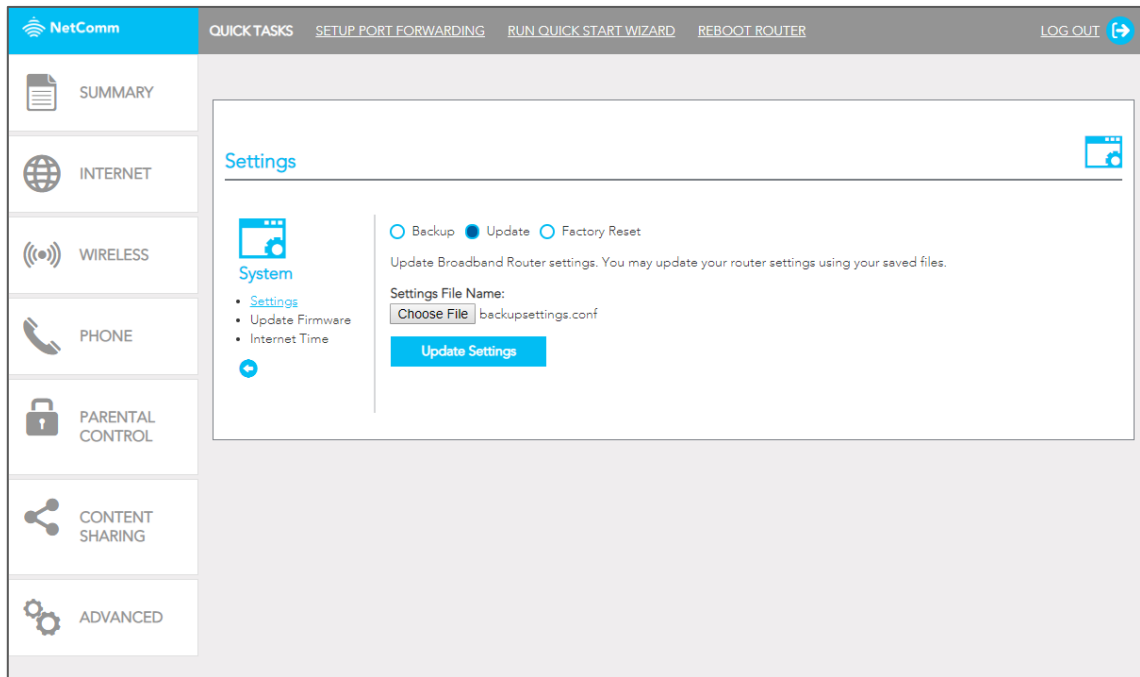

**Note** – The backup file can be renamed to something meaningful to you, but its file extension (.**conf**) must be retained.

## Restore your settings

This section provides you with instructions to restore the saved configuration.

- 1 From the **Advanced** menu, click on **Configurations** in the **System** group.  
The **Settings** page will open.
- 2 From the **Settings** page select the  **Update** radio button and click the **Choose file** button to open the file selector dialog.

- 3 Locate the **Backup Settings** file that you want to restore.
- 4 Click to select the file, its file name will appear to the right of the **Choose file** button on the **Settings** page.
- 5 If you are satisfied that the file is the correct backup, click on the **Update Settings** button to reinstall your previously saved configuration settings.

**Note** – The NF18ACV will update the settings and restart. The process will take around 1-2 minutes.
