Exetel NBN Setup
(NF1ADV)
Configuring NF1ADV for an Exetel NBN Connection

This guide will take you through the steps to connect your NF1ADV to the Exetel NBN Connection by using the Ethernet WAN interface. Ensure that your NBN cable is connected to the WAN port of the router and that your computer is connected to the LAN port or Wireless LAN before you proceed with the guide.

2. Type admin as both the username and password.

3. Click Login to access the basic configuration page.

4. Select the BASIC Menu then click on Quick Setup.

5. Select the **Ethernet WAN** option then click **Next**.

6. Select the **PPP over Ethernet (PPPoE)** option then click **Next**.

7. In the **Username** field, type in your Exetel username which is in the format of `<10-digitServiceNumber>@<state>.exetel.com.au` (e.g. 1234567890@nsw.exetel.com.au)

8. In the **Password** field, type in the password for your Exetel account then click on the **Next** button.
9. You can go through or skip the WiFi, VoIP, USB Storage, Print Server and Password settings then click on the **Finish** button.

10. The NF1ADV will reboot itself to apply the changes.
