How To Get The Wireless Security Key
(NF3Adv)
What is the Wireless Security Key?
The wireless security is also known as the WEP key, WPA key, Passphrase or WiFi password. This guide will take you through the steps on how to check what the current wireless security key is. Note that the security key is case sensitive. Please ensure that your router is connected to your computer using an ethernet cable before continuing.

2. Enter admin for both username and password when prompted then click Login.

3. Click on the Wireless 2.4GHz tab to show the wireless settings for the 2.4GHz band.
4. The **Security Key** of the Wireless 2.4GHz band will be displayed. The example above has a security key of *Sagodatequ* which can only be used with the Wireless Network *NetComm Wireless 9947*. The 2.4GHz band can be used by most devices with WiFi.

5. Click on the **Wireless 5GHz** tab to show the wireless settings for the 5GHz band.

6. The **Security Key** of the Wireless 5GHz band will be displayed. The example above has a security key of *deseyayize* which can only be used with the Wireless Network *NetComm Wireless 6674*. Only devices that support the 5GHz band would be able to connect to it.
