System Log Setup
(N3G002W)
System Log

The system log provides a way to check for problems or provide more information about your issue when requested by Technical Support.
**System Log**

This guide will take you through the steps required to enable your system log.

1. Navigate to [http://192.168.123.254](http://192.168.123.254) in a web browser using “admin” as the system password to login to the N3G001W.
2. Select the “Advanced Setup” menu option.
3. Select the “Toolbox” menu option and then the “System Info” option from the sub-menu on the left hand side.

4. Set the Log Message option to “System Log”.

5. Current System Log entries will then be displayed. You have the option to refresh or clear the current system log entries.
