

- ⦿ Digital Enhanced Cordless Telephone (DECT) Handset
- ⦿ Ideal for use with VoIP and regular telephone services
- ⦿ 30-number phone book
- ⦿ Supports up to 2 handsets from one base station
- ⦿ 5 days standby / 10 hours talk time

With the NetComm V20 DECT Handset you can make cordless telephone calls in any room without the need to be tied to your desk. It can be used in conjunction with VoIP equipment or even connected to a regular telephone line and with digital technology gives you clear, static-free and portable telephone calling (up to 300m from the base station).

The V20 can support up to 2 handsets on the one base station and also includes a 30-number phone book. Between charges, it will give you about 5 days standby and 10 hours talk-time.
