1. Power off your existing **modem** and **PC**

2. Using the supplied **Ethernet cable** connect from a **LAN port** on your modem to the **WAN port** at the back of your **Wireless N Router**

3. Connect your **PC** to any **LAN port** on the back of your **Wireless N Router** (LAN1, LAN2, LAN3, LAN4)
4. Connect the supplied **power adapter** to the **Power socket** at the back of your **Wireless N Router**

5. Power on the **PC**, **modem** and **Wireless N Router**

6. Open a web browser (Internet Explorer, Firefox, Safari) to check your connection.
Establishing a Wireless Connection

You can connect multiple wireless devices, including laptops, desktops and PDA’s to your Wireless N Router by following these two basic steps.

1. Using your wireless device, scan the wireless networks in your area and select the network called NetComm800nSeries. Then click connect.

2. Enter the following default security key: a1b2c3d4e5

Note: To ensure wireless security, we recommend that you change the default settings through the web Interface. For more details, please consult the User Guide.
Troubleshooting

**Cannot establish a wireless connection**
- Make sure the wireless switch on your laptop is in the **on** position
- Ensure your device and wireless adapter are using the same wireless security settings

**Cannot connect to the Internet through the router**
- Make sure that you have connected the supplied Ethernet cable from the **LAN port** of your modem to the **WAN port** of your **Wireless N Router**
NetComm Velocity Series
Accessories for your product
